PRESTAN®

Ultralite® Manikins

Prestan are pleased to offer their newest and most portable manikin, the Ultralite Manikin. The Ultralite Manikin is amazingly easy to set up and available in a convenient and lightweight four-pack for efficient training on-the-go. This durable manikin offers an affordable tool for CPR training, with all the quality and realism you'd expect from Prestan.

- Uniquely fast and easy set-up.
- Stackable torsos and heads, generate a compact package for transporting multiple units.
- Clamshell opening provides easy access.
- Realistic head tilt.
- Visible chest rise with lung bag use.
- Unique torso web design for realistic feel.

PRESTAN®

Ultralite® Manikins

Prestan Manikins

Realistic to the eye and the touch, the Prestan manikin is unlike any other on the market. Our manikins are uniquely designed as a clamshell that accommodates an easy to insert face shield and lung bag. Available individually or in convenient multipacks of four for class training purposes.

Prestan's revolutionary new CPR Rate Monitor allows for instant feedback to both instructor and student showing the rate of chest compression. This allows each student to gauge their rate of compressions on their own as well as allowing the instructor to monitor several students quickly and easily. With our patented face/head tilt, the Prestan manikin simulates the way an actual victim's head would move if they required CPR. In addition, the unique construction of our manikins incorporates a mechanism to help trainees use the appropriate force to compress the chest to the correct depth.
